# WELCOME

Welcome to Build Tomorrow: Construction Sustainability and Innovators Youth Summit at Waltham Forest College.

We are thrilled to host this event and to be able to bring together schools, colleges and industry leaders from across the UK Construction Sector. Today is about building bridges between generations, ideas and technologies as we explore how to shape a more sustainable and inclusive future in construction.

Thank you for being here. Let's collaborate, connect and be inspired to build a better tomorrow.

## SCHEDULE

10AM - 11AM

### DISCUSSION PANEL

LOCATION: 'THE POOL' (1ST FLOOR ENTRANCE)

Guest speakers exploring the Construction & Sustainability Sectors. Trying to answer the main question: "Is it tomorrow yet?".

---

11:00AM - 11:30AM

### BREAK

Refreshments can be bought from Café on 2 in the main building near reception. There are also shops and restaurants within 10 minutes walk of the College in both directions.

---

11:30AM - 2:00PM

### EXHIBITION

LOCATION: LEARNING RESOURCE CENTRE

At the core of the Build Tomorrow summit, the exhibition showcases leading companies and organisations in construction and related industries.

## GET SOCIAL

Please share this event on your social channels using the tag **#BuildTomorrow** and tagging in the College.

# PANELLISTS

Join our panellists for discussions around construction and sustainability as they attempt to answer the summit's key question: "Is it tomorrow yet?".

## SAUL HUMPHREY

**VICE-PRESIDENT:** CIOB

Saul is Managing Partner of a B Corp consultancy, Professor of Sustainable Construction at ARU and incoming President of the CIOB. A sustainability award-winner, he chairs multiple boards and councils, driving sustainable development and leadership in the UK construction and property sectors.

## NICK NEWMAN

**DIRECTOR:** U-BUILD

Nick Newman, Founder of Studio Bark and U-Build, is an environmental architect, climate activist and author. His work focuses on the circular economy, modular systems and deep energy retrofits. Named a 'Rising Sustainability Star,' he champions hands-on climate education and authored 'Protest Architecture: Structures of civil resistance' in 2024.

## CHLOE DONOVAN

**MANAGING DIRECTOR:** NATURAL BUILDING SYSTEMS

Chloe Donovan FRSA, Forbes 30 Under 30 honouree and Trustee of the Food Ethics Council, co-founded Natural Building Systems. Her work combines bio-based materials with modular design to create healthier, sustainable buildings using the ADEPT Kit-of-Parts (developed by Natural Building Systems) for homes, studios and classrooms.

## ADAM WHITE

**CEO:** INTELLIGENT MEMBRANES

Adam White, Founder & CEO of Intelligent Membranes, leads innovation in sustainable construction. His Passivhaus-certified products set industry standards in airtightness, fire resistance and waterproofing. He is helping projects worldwide achieve Net Zero and Passive House certification through smarter, future-focused building solutions.

# PANELLISTS

Join our panellists for discussions around construction and sustainability as they attempt to answer the summit's key question: "Is it tomorrow yet?".

## ELLORA COUPE

**FOUNDER:** HER RETROFIT SPACE

Ellora Coupe is the founder of Her Retrofit Space, a pioneering network supporting women in retrofit. Through CPD, mentorship and industry links, Her Retrofit Space empowers professionals and students to lead change in sustainable building. Her "Build Tomorrow" initiative connects education to green career pathways.

## ELE GEORGE

**INDUSTRY COLLABORATION LEAD:** INDINATURE

Ele George, award-winning sustainability engineer and Industry Collaboration Lead at IndiNature, drives innovation in low-carbon, bio-based construction. With over two decades experience, she champions Modern Methods of Construction, equity and education, forging partnerships that bridge industry and learning to create a skilled, sustainable workforce.

## ROD DAVIES

**CO-FOUNDER:** ENERGY CARBON

Rod is Founder and Managing Director of Energy Carbon Ltd. Established in the UK since 2020 Energy Carbon manufactures a range of alternative, low energy heating and ventilation solutions for all property types.

## TONY MOONEY

**DIRECTOR - SKILLS & TRAINING:**  
ENERGY EFFICIENCY ASSOCIATION

Tony Mooney, former manager of the DWP Kickstart programme, now leads initiatives connecting people to green skills and careers. At the Energy Efficiency Association he's building tools and pathways from an online training library to an employment unit aimed at inspiring UK youth into the retrofit industry.

# EXHIBITORS

Visit the exhibition in the LRC between 11am-2pm to engage with leading companies and experts in the Construction and Sustainability Sectors.

The logo for BLOQS, consisting of the word 'BLOQS' in bold black uppercase letters enclosed within a black rectangular frame that has small gaps on the left and right sides.
